

VIP – PROTECTION & EXECUTIVE SURVIVAL

Our Experience

Spanning over 4 decades we are considered as 'experts' in this field and all of our training and advice is from **Real Life Experiences** – not classrooms!

Of course we appreciate that the classroom is also important to the development of your skills and techniques to ensure that our Training Modules 'fit in' with our clients particular needs.

There are many different aspects to VIP Protection and also Executive Protection – this is why we, as a responsible company offer a separate training system for both of these.

Not everyone requires armoured vehicles nor convoys, certain companies employ us to look after their Executives and Senior Management, whilst many Governments employ us to look after Presidents, Royal Families etc.

One thing you can be assured of is our total commitment to train you effectively.

Our Methodology

Whilst many companies offer 'training' they tend to lose the 'Human Factor' in any operation that they are working in – our entire ethics are borne through **REAL PEOPLE** in **REAL LIFE SITUATIONS**.

We do not believe in fantasy – only cold hard facts.

Our methods of 'protection' can either be 'Overt' or 'Covert' as not everyone wishes nor requires it to be 'obvious' that they are under protection.

We work very closely with all of our clients and any family members that may require our assistance, we also cover the entire project from A – Z and ensure that nothing is left to chance.

The only trophy worth having.....is your Life!
