HYBRID WARFARE A THREAT TO THE MIDDLE EAST

Small wars in the midst of the big one creating sectarian elements, insurgency, domestic terrorism & criminal elements used for a specific end.

It is a hydra, a multi headed problem.

It is interconnected, unpredictable, combined with traditional, mixed with irregular, applied simultaneously & adaptively, anytime anywhere.

THE AGGRESSOR

The aggressor uses clandestine actions to avoid attribution or retribution.

Conflict evolves under the radar

Cannot rely on one course of action

The aim is for economic disruption

Diplomatic breakdown

Disruption of friendly states

Disruption of political support

Disruption of communications & information, i.e., emails web sites & IT in general.

Promote in the victims country a tolerance for drug & alcohol abuse

RELATED CRIME

Other related crimes are, drugs, arms smuggling, counterfeit goods trade, human trafficking & money laundering etc. Criminal proceeds from these acts create funding for training & equipping Hybrid Forces.

Hybrid warfare uses an enemy that simultaneously & adaptively employs a complex combination conventional weapons, irregular warfare, terrorism & criminal acts in the conflict zone to achieve political objectives.

SECURITY INTELLIGENCE IS NEEDED

Security Intelligence is defined as Intelligence collated for the security of a nation or state

To counter threats by organised crime backed by Governments to destabilise, disrupt, bankrupt economy & countries stability security Intelligence specialists are required.

Operators used to counter the threat of hybrid warfare, must be COMFORTABLE IN THE UNCOMFORTABLE.

Infiltration & intelligence collation beneath the radar & outside the borders of the client country are paramount.

A vital point of understanding the hybrid threat is understanding the total lack of moral & ethical restraint displayed by the adversary.

Education & training play a huge part of countering hybrid threats.

HYBRID – ACTION?

The need to secure the economic, diplomatic, friendly supporters, political supports & energy sectors is paramount, also the security for communications, information & IT security .

All this must be adapted for land, sea & air options. These will become targets in hybrid warfare.

Yemen, Russia, China, Iraq, Syria & Ukraine are all prime examples of hybrid warfare in action, it is ever flexible and always moving - and **NOTHING** is being done.

The measures they have in these countries are simply not adequate.

PHYSICAL COUNTERS TO HYBRID WARFARE

Facility Security Management Training

Facility Unorthodox weapon response training (what happens if scenarios)

VIP & Executive protection of key individuals & decision/policy makers

Guard Force creation, training & Management

Convoy Security Training

Security driver training

Hostile Area Risk Management

IT & cyber space security

Maritime security to include SRT dive capability

Special Projects Training & Assistance

OUR SOLUTION

THE REAL DRIVING FORCE IS COUNTERING NARCOTICS, WHICH PRODUCES HUGE FUNDING FOR HYBRID WARFARE & THE HYDRA WILL BE REDUCED, A HEAD WILL BE LOST.

AS WE EXPAND OUR INTELLIGENCE AND COUNTER NARCOTICS MOVEMENTS, WE WILL EVENTUALLY CUT OFF THE 'DEMAND' AND ALSO REMOVE THE 'SOURCE'

WE HAVE MANY, MANY YEARS OF REAL LIFE EXPERIENCE AND LOOK FORWARD TO SHARING THIS WITH YOU AND OFFERING OUR TRAINING & HELP.
